## ASUS - UX325E Series : UX325E

### Specifications

|                                                  |                                 |
|--------------------------------------------------|---------------------------------|
| ENERGY STAR Unique ID:                           | 2366660                         |
| Brand Name:                                      | ASUS                            |
| Model Name:                                      | UX325E Series                   |
| Model Number:                                    | UX325E                          |
| Type:                                            | Notebook                        |
| Category 1: Processor Brand:                     | Intel                           |
| Category 1: Processor Name:                      | Core i3                         |
| Category 1: Base Processor Speed Per Core (GHz): | 3.0                             |
| Category 1: Physical CPU Cores (count):          | 2                               |
| Category 1: System Memory (GB):                  | 8                               |
| Category 1: Default Low-power Mode:              | Connected Sleep(Modern Standby) |
| Category 1: Long Idle Power Used for Sleep Mode: | No                              |
| Category 1: Off Mode (watts):                    | 0.8                             |
| Category 1: Sleep Mode (watts):                  | 0.7                             |
| Category 1: Long Idle (watts):                   | 0.7                             |
| Category 1: Short Idle (watts):                  | 5.1                             |
| Category 1: Base TEC Allowance (kWh):            | 8                               |
| Category 1: Functional Adder Allowances (kWh):   | 12.3                            |
| Category 1: TEC of Model (kWh):                  | 17.9                            |
| Category 2: Processor Brand:                     | Intel                           |
| Category 2: Processor Name:                      | Core i7                         |
| Category 2: Base Processor Speed Per Core (GHz): | 2.8                             |
| Category 2: Physical CPU Cores (count):          | 4                               |
| Category 2: System Memory (GB):                  | 32                              |
| Category 2: Default Low-power Mode:              | Connected Sleep(Modern Standby) |
| Category 2: Long Idle Power Used for Sleep Mode: | No                              |
| Category 2: Off Mode (watts):                    | 0.8                             |
| Category 2: Sleep Mode (watts):                  | 0.7                             |
| Category 2: Long Idle (watts):                   | 0.8                             |
| Category 2: Short Idle (watts):                  | 5.8                             |

|                                                                                                                                                                         |                       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| <b>Category 2: Base TEC Allowance (kWh):</b>                                                                                                                            | 14                    |
| <b>Category 2: Functional Adder Allowances (kWh):</b>                                                                                                                   | 19.3                  |
| <b>Category 2: TEC of Model (kWh):</b>                                                                                                                                  | 19.8                  |
| <b>Notebooks, Desktops, Integrated Computers, Slate/Tablets, Two-in-one Notebooks, and Portable All-in-ones Category for TEC (Typical Energy Consumption) Criteria:</b> | 2,1                   |
| <b>Category 1: Operating System Name:</b>                                                                                                                               | Windows 10            |
| <b>Category 2: Operating System Name:</b>                                                                                                                               | Windows 10            |
| <b>Sleep Mode Default Time Upon Shipment (min.):</b>                                                                                                                    | 10                    |
| <b>Display Sleep Mode Default Time Upon Shipment (min.):</b>                                                                                                            | 10                    |
| <b>Will the Speed of Any Active 1 GB/s or Higher Ethernet Network Links be Reduced to Less Than 1 GB/s When Transitioning to Sleep or Off Mode?:</b>                    | No                    |
| <b>Ethernet Capability:</b>                                                                                                                                             | No                    |
| <b>Touch Screen:</b>                                                                                                                                                    | No                    |
| <b>Date Available On Market:</b>                                                                                                                                        | 2020-09-15            |
