## DELL - P127F : Latitude 5540

### Specifications

|                                                  |               |
|--------------------------------------------------|---------------|
| ENERGY STAR Unique ID:                           | 2407890       |
| Brand Name:                                      | DELL          |
| Model Name:                                      | P127F         |
| Model Number:                                    | Latitude 5540 |
| Type:                                            | Notebook      |
| Category 1: Processor Brand:                     | Intel         |
| Category 1: Processor Name:                      | Core i3       |
| Category 1: Base Processor Speed Per Core (GHz): | 1.2           |
| Category 1: Physical CPU Cores (count):          | 6             |
| Category 1: System Memory (GB):                  | 64            |
| Category 1: Default Low-power Mode:              | ALPM          |
| Category 1: Long Idle Power Used for Sleep Mode: | Yes           |
| Category 1: Off Mode (watts):                    | 0.4           |
| Category 1: Sleep Mode (watts):                  | 1.0           |
| Category 1: Long Idle (watts):                   | 1.0           |
| Category 1: Short Idle (watts):                  | 6.1           |
| Category 1: Base TEC Allowance (kWh):            | 8             |
| Category 1: Functional Adder Allowances (kWh):   | 33.3          |
| Category 1: TEC of Model (kWh):                  | 20.6          |
| Category 2: Processor Brand:                     | Intel         |
| Category 2: Processor Name:                      | Core i7       |
| Category 2: Base Processor Speed Per Core (GHz): | 1.9           |
| Category 2: Physical CPU Cores (count):          | 14            |
| Category 2: System Memory (GB):                  | 64            |
| Category 2: Default Low-power Mode:              | ALPM          |
| Category 2: Long Idle Power Used for Sleep Mode: | Yes           |
| Category 2: Off Mode (watts):                    | 0.4           |
| Category 2: Sleep Mode (watts):                  | 1.2           |
| Category 2: Long Idle (watts):                   | 1.2           |
| Category 2: Short Idle (watts):                  | 5.8           |

|                                                                                                                                                                         |                                                   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------|
| <b>Category 2: Base TEC Allowance (kWh):</b>                                                                                                                            | 14                                                |
| <b>Category 2: Functional Adder Allowances (kWh):</b>                                                                                                                   | 33.3                                              |
| <b>Category 2: TEC of Model (kWh):</b>                                                                                                                                  | 21.0                                              |
| <b>Notebooks, Desktops, Integrated Computers, Slate/Tablets, Two-in-one Notebooks, and Portable All-in-ones Category for TEC (Typical Energy Consumption) Criteria:</b> | 2,1                                               |
| <b>Category 1: Operating System Name:</b>                                                                                                                               | Windows 11                                        |
| <b>Category 2: Operating System Name:</b>                                                                                                                               | Windows 11                                        |
| <b>Sleep Mode Default Time Upon Shipment (min.):</b>                                                                                                                    | 10                                                |
| <b>Display Sleep Mode Default Time Upon Shipment (min.):</b>                                                                                                            | 10                                                |
| <b>WOL (Wake on LAN) From Sleep:</b>                                                                                                                                    | Shipped Disabled                                  |
| <b>Will the Speed of Any Active 1 GB/s or Higher Ethernet Network Links be Reduced to Less Than 1 GB/s When Transitioning to Sleep or Off Mode?:</b>                    | No                                                |
| <b>Ethernet Capability:</b>                                                                                                                                             | Yes                                               |
