

## ENERGY STAR CERTIFIED Enterprise Servers

### DELL EMC - E86S : PowerEdge T560-1P

#### Specifications

|                                                            |                       |
|------------------------------------------------------------|-----------------------|
| ENERGY STAR Unique ID:                                     | 2618140               |
| ENERGY STAR Partner:                                       | Dell Inc.             |
| Brand Name:                                                | DELL EMC              |
| Model Name:                                                | E86S                  |
| Model Number:                                              | PowerEdge T560-1P     |
| Form Factor:                                               | Tower/Pedestal        |
| Resilient System:                                          | No                    |
| Available Expansion Slots:                                 | 8                     |
| Operating Systems Supported:                               | Windows, Linux, Other |
| Power Saving Features Available:                           | Other                 |
| Product Processor Socket Count:                            | 2                     |
| Available DIMM Slots:                                      | 16                    |
| Maximum Memory Capacity (GB):                              | 2048.0                |
| Installed Processors for Typical or Single Configuration:  | 1                     |
| Cores Per Processor Typical or Single Configuration:       | 24                    |
| Number of Threads for Typical or Single Configuration:     | 48                    |
| Processor Brand Typical or Single Configuration:           | Intel                 |
| Processor Model Name Typical or Single Configuration:      | Gold 5412U            |
| Processor Speed for Typical or Single Configuration (GHz): | 2.1                   |
| Num. of DDR Channels for Typical or Single Configuration:  | 8                     |
| Memory Speed Typical or Single Configuration (GHz):        | 4.8                   |
| Typical or Single Configuration Size Per DIMM (GB):        | 16                    |
| Installed Num. DIMMs for Typical or Single Configuration:  | 8                     |
| Installed Memory for Typical or Single Configuration (GB): | 128.0                 |
| Typical or Single Configuration Redundant Power Supply:    | Yes                   |

|                                                                     |                              |
|---------------------------------------------------------------------|------------------------------|
| SERT Active State Efficiency Score Typical or Single Configuration: | 42.30                        |
| SERT Version :                                                      | Other                        |
| SERT Version Other :                                                | 2.0.7                        |
| 64-bit Architecture:                                                | 64-bit supported             |
| Date Available On Market:                                           | 2024-02-05                   |
| Date Certified:                                                     | 2023-07-27                   |
| Markets:                                                            | United States, Japan, Canada |
| ENERGY STAR Certified:                                              | Yes                          |
