# Electric Vehicle Chargers (AC-Output)

## Grizzl-E - Grizzl-E Smart : GRS-14-24-P

### Specifications

|                                                       |                           |
|-------------------------------------------------------|---------------------------|
| Brand Name:                                           | Grizzl-E                  |
| Model Name:                                           | Grizzl-E Smart            |
| Model Number:                                         | GRS-14-24-P               |
| ENERGY STAR Unique ID:                                | 2378449                   |
| ENERGY STAR Partner:                                  | United Chargers Inc.      |
| Product Type:                                         | Level 2                   |
| Input Voltage (V):                                    | 240.0                     |
| Max Nameplate Output Current (A):                     | 40                        |
| Maximum Output Power (kW):                            | 9.6                       |
| Number of Outputs:                                    | 1                         |
| Maximum Output Cord Length (ft.):                     | 24                        |
| Output Cord Gauge (AWG):                              | 8                         |
| Automatic Brightness Control (ABC) Capable?:          | No                        |
| Network Connection Types Available:                   | Wi-Fi or Gigabit Ethernet |
| 15 A Operation Mode Test: Total Loss (watts):         | 17.14                     |
| 30 A Operation Mode Test: Total Loss (watts):         | 54.12                     |
| 4 A Operation Mode Test: Total Loss (watts):          | 5.83                      |
| Full Current Operation Mode Test: Total Loss (watts): | 91.99                     |
| Idle Mode Input Power (watts):                        | 5.2                       |
| Idle Mode Power Factor:                               | 0.43                      |
| Idle Mode Total Allowance (watts):                    | 19.6                      |
| No Vehicle Mode Input Power (watts):                  | 2.33                      |
| No Vehicle Mode Power Factor:                         | 0.33                      |
| No Vehicle Mode Total Allowance (watts):              | 3.6                       |
| Partial On Mode Input Power (watts):                  | 2.38                      |
| Partial On Mode Power Factor:                         | 0.34                      |
| Partial On Mode Total Allowance (watts):              | 3.6                       |
| Date Certified:                                       | 2024-08-06                |
| Date Available on Market:                             | 2024-08-06                |
| Markets:                                              | United States, Canada     |
| ENERGY STAR Certified:                                | Yes                       |
